True/False

Indicate whether the sentence or statement is true or false.

- _____ 1. HTML is a markup language used to design web pages.
- _____ 2. A web site is a location on a web server containing resources accessible to the Internet.
- _____ 3. HTML displays correctly only if all the HTML tags in the document are in lowercase.
- _____ 4. An HTML document contains the start tag `<body>` and the end tag `<tail>`.
- _____ 5. An HTML tag must be enclosed by angle brackets `<>`.
- _____ 6. HTML tag names are single words containing no spaces or punctuation.
- _____ 7. An HTML **element** consists of a HTML start tag, optional attributes, optional text, and an HTML end tag.
- _____ 8. HTML content cannot have spaces, tabs or empty lines between the tags.
- _____ 9. The rules of HTML syntax are governed by the W3C organization, started in part by Tim Berners-Lee, the inventor of HTML.
- _____ 10. Any HTML content displayed in a browser will appear exactly the same regardless of browser.
- _____ 11. HTML content displayed on an Apple Mac based browser will appear different than on a Microsoft Windows based browser.
- _____ 12. HTML files are human readable text files.
- _____ 13. Any white space, tabs or new lines contained within an HTML document are displayed in the browser as entered.
- _____ 14. An HTML element may be defined inside another HTML start tag as an attribute. For example, `<b <i> </i> >` is valid HTML usage.
- _____ 15. An HTML element consists of an HTML start tag, some content, and an HTML end tag.
- _____ 16. The order of the attributes defined in an HTML start tag matters.
- _____ 17. HTML attributes are defined only in the HTML start tags, never in the HTML end tags.
- _____ 18. HTML tag names are all alphabetic and do not have numbers.
- _____ 19. Through HTML any text or image content can be defined to be a hyperlink to another HTML document or resource on the internet.
- _____ 20. HTML documents are displayed in the target output format, which refers to the medium in which a document will be displayed, such as a Web page, mobile device, or a printer.

Answer Section

TRUE/FALSE

1. ANS: T
2. ANS: T
3. ANS: F
HTML tags can be either uppercase or lowercase. XHTML (extensible HTML) tags must be in lowercase.
4. ANS: F
False. HTML documents have the `<body>` as the start tag and `</body>` as the end tag.
5. ANS: T
6. ANS: T
7. ANS: T
8. ANS: F
9. ANS: T
10. ANS: F
False. Microsoft Internet Explorer version 7 interprets some property definitions differently.
11. ANS: F
HTML is intended to be displayed the same regardless of browser, operating system, or hardware platform.
12. ANS: T
13. ANS: F
HTML is free-format meaning white space is ignored.
14. ANS: F
HTML elements cannot be defined inside the start tag of an existing HTML element. The correct usage for the example is `<b> <i> </i> </b>`
15. ANS: T
16. ANS: F
Attributes may be defined in any order within the HTML start tag.
17. ANS: T
18. ANS: T
19. ANS: T
20. ANS: T
